

How tweeter works:

Tweeter is an online news and social networking site. Where people communicate in short messages known as tweets. **Tweeting** is posting this short message for people to see and contribute. One should endeavor to build larger following so that your tweets can reach larger audience

- Once in your account you can **compose a new tweet** (Process shown in attached twitter account pdf). The tweet may contain pictures, video or information. You can **attach** them to you tweet
- The number of characters you can use in tweeter is limited to 280 characters. If your message is longer you use the plus sign to string the tweets together
- Tweeter users **follow** each other-if you follow a person you will see their tweets on your tweeter page or timeline
- You can choose whoever you want to follow. Or unfollow
- You can create your own tweets through Compose new tweet page or you can **retweet** information tweeted by others (Retweeting ensures information reaches greater number of people)
- You can **Tag** a person in your post and also you can send a **direct message** to their inbox (DM) (Process shown in attached twitter account pdf)
- **#Hashtags** are useful in adding to a larger conversation. you can tap on the Hashtag and view the tweets and also you can add to the conversation. If need be you can create your own #hashtag and let people contribute.
